DETAILED ACTION

Response to Amendment

1. Applicant's amendment was received on 9/13/05, and has been entered and made of record. Currently, **claims 1-5, 8-11, 14-18, 20, 23, 24, and 28-30** are pending.

Allowable Subject Matter

2. **Claims 1-5, 8-11, 14-18, 20, 23, 24, and 28-30** are allowed (**renumbered as claims 1, 2, 5, 6, 3, 7-14, 16-20, 4, and 15, respectively**).

3. The following is an examiner's statement of reasons for allowance:

Regarding *claims 1 and 16 (renumbered claims 1 and 13, respectively)*, in the examiner's opinion, it would not have been obvious to one of ordinary skill in the art at the time the invention was made to have an apparatus, as claimed, include the features of transmitting the image information without the transmission information attached thereto by the transmission information attaching device when the not-attaching transmission information setting for the address is selected. The closest prior art, previously noted as Nakayama (U.S. Patent Number 5,084,770), was interpreted as teaching of attaching transmission information, but fails to particularly teach of selecting a not-attaching transmission information setting. Thus, Nakayama fails to teach of transmitting the image information without the transmission information attached thereto by the transmission information attaching device when the not-attaching transmission information setting for the address is selected the transmission information including information of at least one of transmitter, date and time of transmission, and a number

of transmitted pages. These limitations, which were altered in the amendment dated 9/13/05, render the claims allowable.

Regarding *claims 3, 8, 11, 18, 20, and 28 (renumbered claims 5, 7, 10, 16, 17, and 20, respectively)*, in the examiner's opinion, it would not have been obvious to one of ordinary skill in the art at the time the invention was made to have a systems, as claimed, include the features of having the transmission information device attaching or not attaching the transmission information based on the identified domain name of the receiver. The closest prior art, previously noted as Kulakowski (WIPO Publication Number WO 97/10668) and Eguchi (U.S. Patent Number 6,574,670), each fail to expressly disclose these features, which were revised in the amendment dated 9/13/05. Therefore, the claims are rendered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
